COURSE OVERVIEW

The Gateway Pilates program is designed to provide an introductory understanding of Pilates and the Polestar approach that encourages successful, result-driven movement experiences. As it is derived from science-based body mechanics, Pilates offers the tools to produce efficient exercise in a way that strengthens, rehabilitates and prevents injuries. In this program, selected Pilates Reformer exercises are taught to provide practical and applicable knowledge of form and sequencing techniques. It serves as a gateway to realising the complete benefits of accurate exercise.

Beginning with at-home study preparation, the program progresses into experimental labs for well-rounded and collaborative learning. You will experience a variety of movement sequences throughout the course that can be immediately incorporated into health and fitness programs.
